

POP Services

Projects+Operations+Performance

ABOUT POP SERVICE

POP services was born out of a want to help everyday business and organisations make **lasting meaningful change** and to enable the realisation of **ideas**. **POP services** seeks to **strengthen** local business and the community they operate in.

POP services principal consultant **Eleftherios (Terry) Moschos** has extensive experience across a broad range of industries from Mining and Oil & Gas to the hospitality sector. He has leveraged this knowledge with a **Masters in Applied Project Management** and **Full-Stack Web Development** through the University of Adelaide and the combination of "Real world" + "Academic" = "Practical knowledge".

In other words **POP services** delivers solutions tailored to each **individual situation** that **work**.

VISION + MISSION

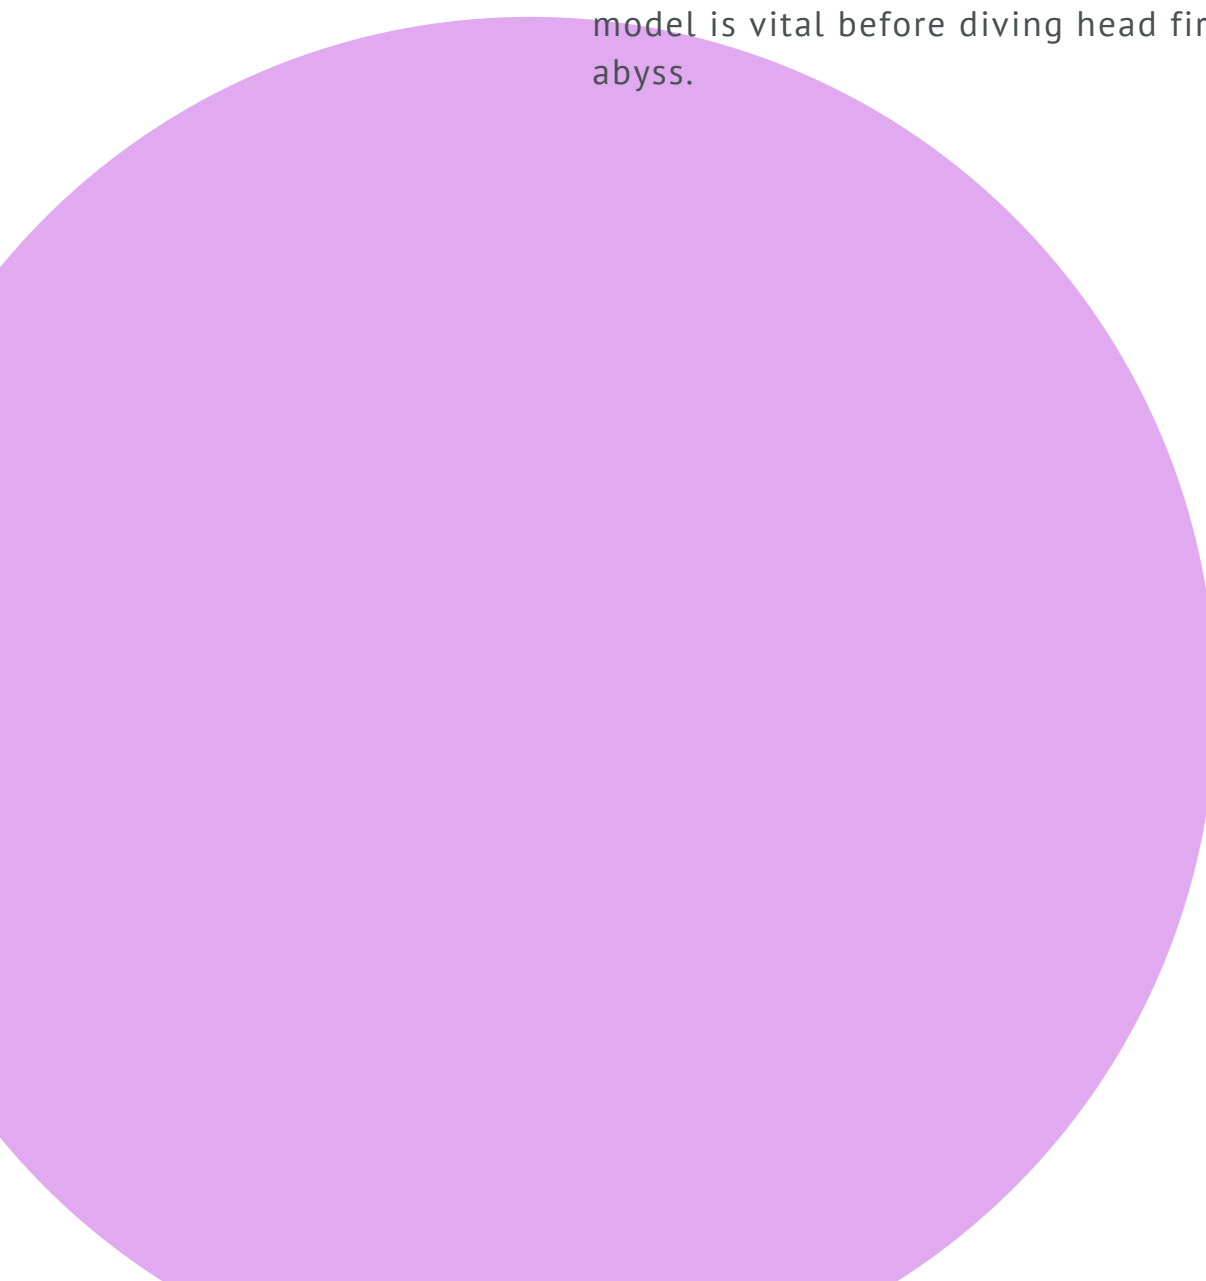

Exploring and implementing ideas of local businesses and organisations for the benefit of our clients and the wider community.

We work closely with businesses and organisations to become apart of their ongoing operation so that we can deliver high quality and lasting projects that provide realised benefits to our clients but also to the wider local community.

01

PROJECTS + INNOVATION

Projects bring new ideas to life. POP services can assist you in realising those ideas through the use of project management tools and techniques such as market research, project definition, work breakdown structure (WBS), scheduling and timeline creation and cost/benefit analysis. By understanding how the idea/project may impact your business or fit your business model is vital before diving head first into the abyss.

02

OPERATIONS + STRATEGY

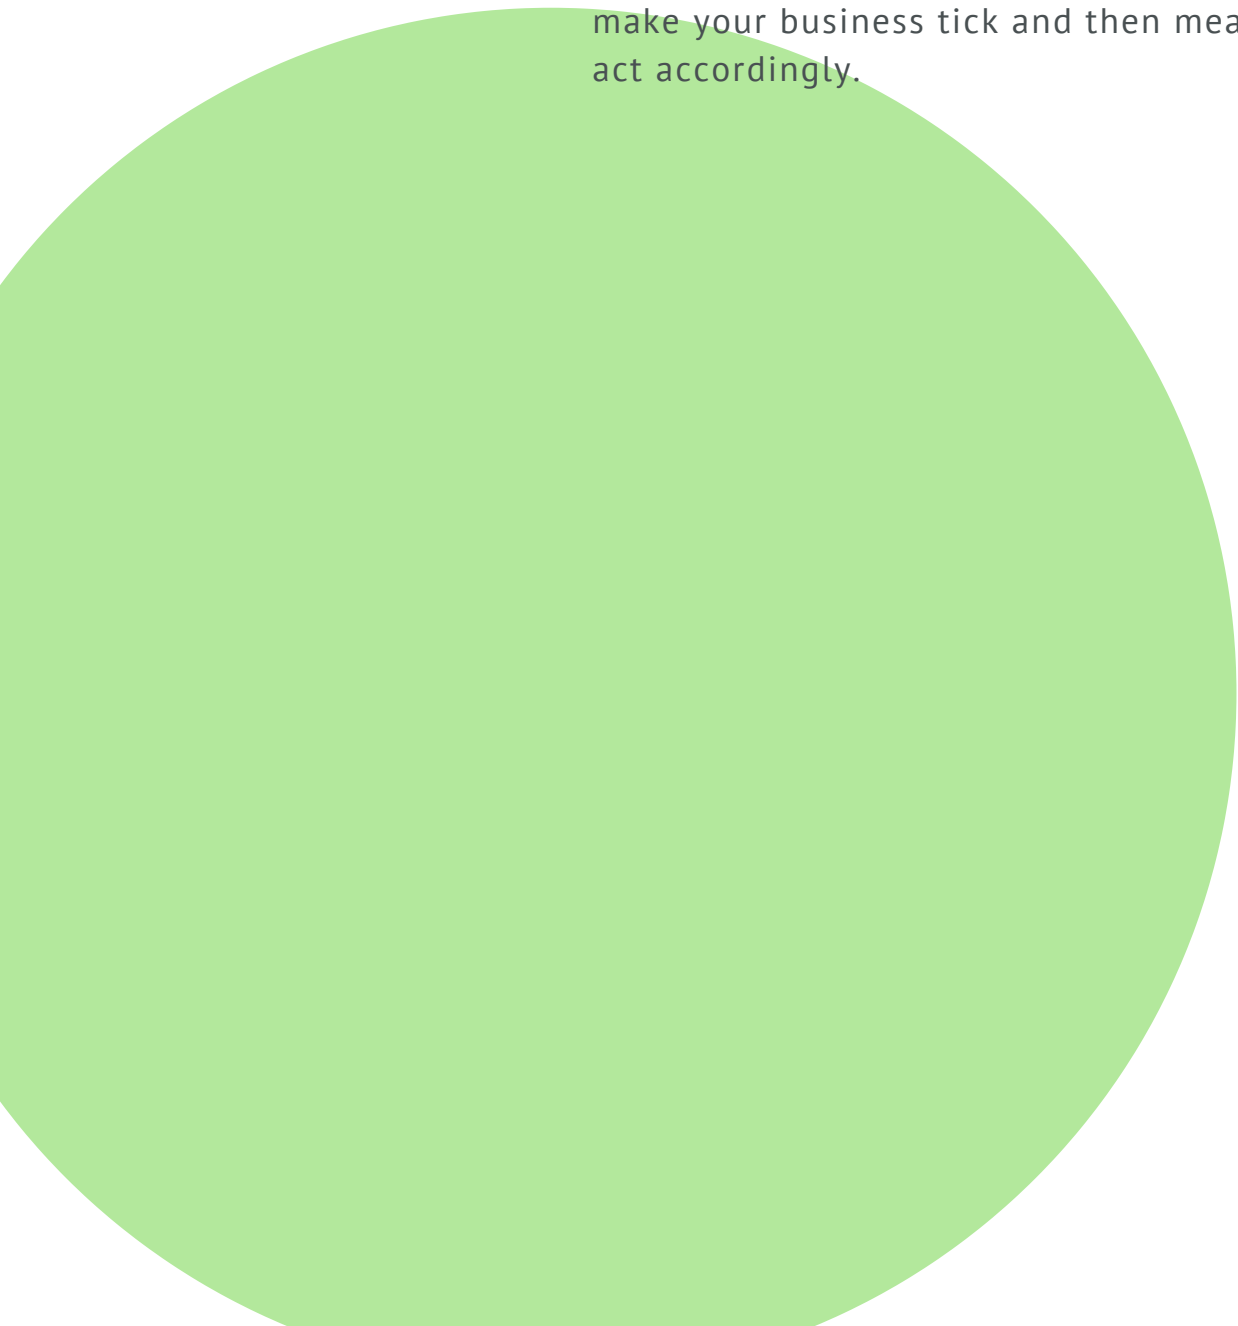

Focus on the things that matter. Quite often businesses and organisations waste a lot of time and effort in doing "stuff" that has little to no positive impact on their desired outcomes.

Further to this most businesses and organisations don't have a detailed strategy or road map that help guide their decisions. POP services can assist in developing strategic plans, process and procedures, streamline workflows, risk management and decision making. These tools will help to strengthen your business position in the current market and stay relevant when the operating environment changes.

03

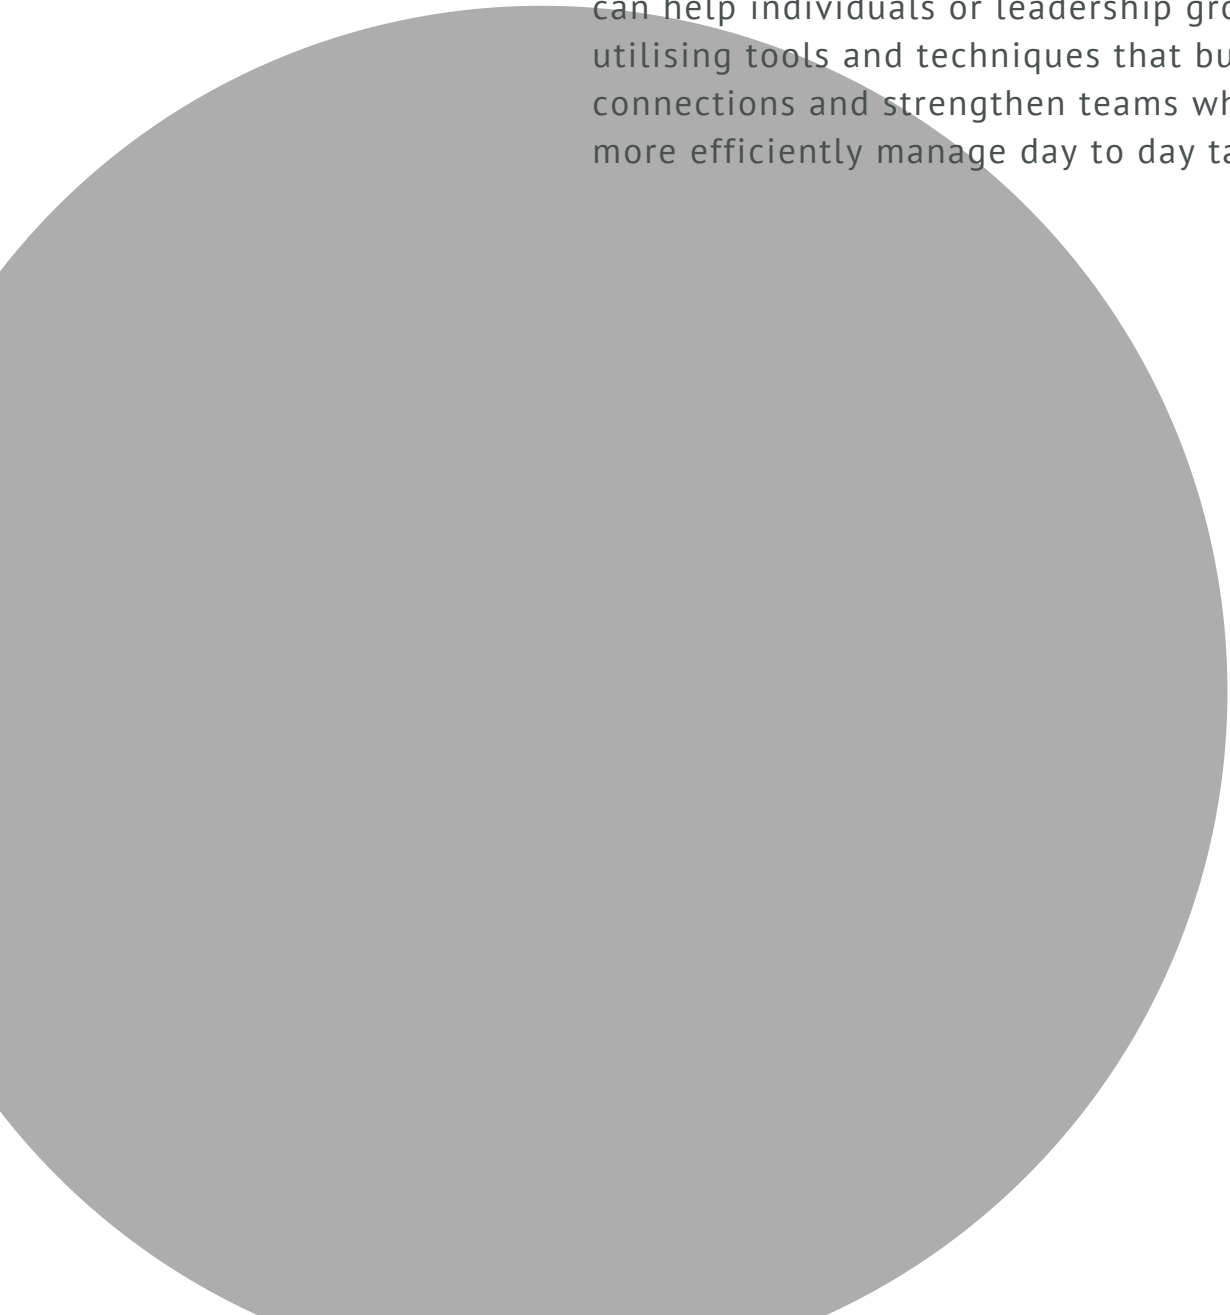

PERFORMANCE + GROWTH

Measure and grow. If you can't measure something and know the results its near impossible to improve and grow. By setting clear Key Performance Indicators (KPI's) your businesses is then able to understand where it is performing poorly or performing well. POP services will help you determine the metrics that make your business tick and then measure and act accordingly.

MANAGEMENT + LEADERSHIP

Management is not leadership. Management is doing things right; leadership is doing the right things. Almost always these 2 concepts gets confused or blurred with each other. Most people are not prepared for leadership roles and mainly focus on managing instead of also leading. We can help individuals or leadership groups by utilising tools and techniques that build connections and strengthen teams while also more efficiently manage day to day tasks
